NIC requirments are not expected to be available. Such special requirements include point to point cluster communication in the form of single channel per carrier network (SCPC) and the need for co-location of SCPC nodes with the existing NIC NET nodes for efficient hand shaking of NICNET and its overlay. In addition, the Ku-band overlay of NICNET will provide the country the much needed learning curve in the utilisation of Ku-band and provide the motivation for indigenous availability of the Ku-band ground equipment by the time INSAT 2-C makes available the Ku-band transponders.

However for its underlay network for the extension of NICNET to Tehsil/Block levels, NIC has proposed to utilise the available transponder capacity of extended C-band in INSAT 2A/2B.
